

MANX SQ SERIES

Line-scan SWIR Camera with Square Pixels

- Line-scan SWIR Camera with 512, 1024, 2048 resolution
- In-house developed InGaAs sensor

WORLD'S FASTEST InGaAs LINE-SCAN CAMERA

Based on a brand new, in-house developed InGaAs linear detector, the Manx square (SQ) is a high-performance short-wave infrared (SWIR) camera providing high speed and quality line-scan imaging. At unprecedented line rates of up to 256 kHz (or 128 kHz), the Manx square (SQ) stands as the fastest line-scan InGaAs camera available in the world.

The Manx square (SQ) is able to provide up to 2048 pixel resolution. It also presents the lowest noise performance record for a 2048 pixel SWIR linear camera, combined with excellent dynamic range.

The use of CoaXPress interfacing enables fast and reliable data transfer.

The Manx square (SQ) is offered in 3 different resolutions of 512, 1024 or 2048 pixels.

Silicon wafer inspection, TFT screen inspection, food and agricultural produce sorting are some industrial applications that would benefit from this new line of ultra fast linear SWIR cameras.

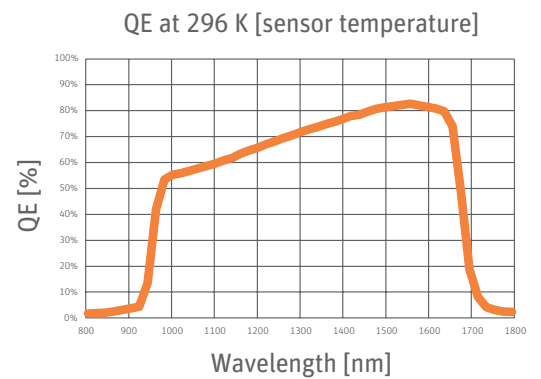

The cameras have standard on-board image correction featuring non-uniformity correction (NUC), bad pixel replacement (BPR) and gain control. For more info on other image enhancement features, contact our sales department.
